

# Open Source Support Services

Powered by  
Lyra Infosystems

Enabling IT evolution through  
identification, implementation,  
and consulting.

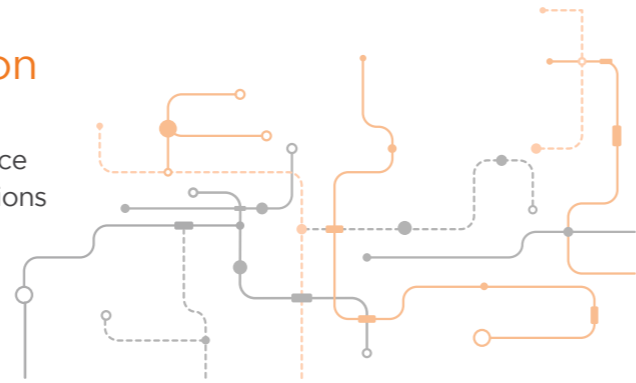

**LYRA**  
Infosystems

It's no secret that Open Source Software (OSS) is proven to accelerate time-to-market, eliminate potential security threats, and increase productivity. All this, while keeping your costs in control and fostering a best-practice driven culture that drives innovation. The key to the success of your OSS implementation, however, is efficient adoption management - from assessment to implementation to support.

This is where Lyra comes in.

### A proficient partner for effective execution

A pioneer in the OSS landscape, Lyra Infosystems has spent half a decade paving the way for enterprises to adopt OSS with confidence and ease. Today, our team is adept at providing cutting-edge solutions to cover the entire range of activities around OSS deployment for organizations of various sizes:

**Security**

The importance of security in a software system that is open for all to code cannot be overstated. Our careful assessment of risk factors and instant resolution to vulnerabilities ensure that you are always in good hands.

- Vulnerability Assessment
- Vulnerability Resolution
- License Compliance
- Security Audit of the existing code
- Open Source Security
- Intellectual Theft Management

**Training and consultation**

The lack of training support and consultation by vendors is a major hurdle in the adoption of OSS. At Lyra, we don't just extend these services. We proactively keep you abreast of all developments, so you stay ahead of the market.

- Product Training
- Technical Training
- Closed to Open Source Migration
- Open to Closed Source Migration
- Data Migration
- Software Upgrades

**Open Source Support services**

New patches and updates in OSS often take time to be made public, depriving you of new features for long stints. We help reduce your dependency on vendors by providing solutions that improve productivity while simultaneously shielding against Intellectual Property Rights (IPR) infringements.

- Upgrades
- Backporting
- Patch Management
- Data Migration
- Monitoring
- Resolution to Open Source Issues

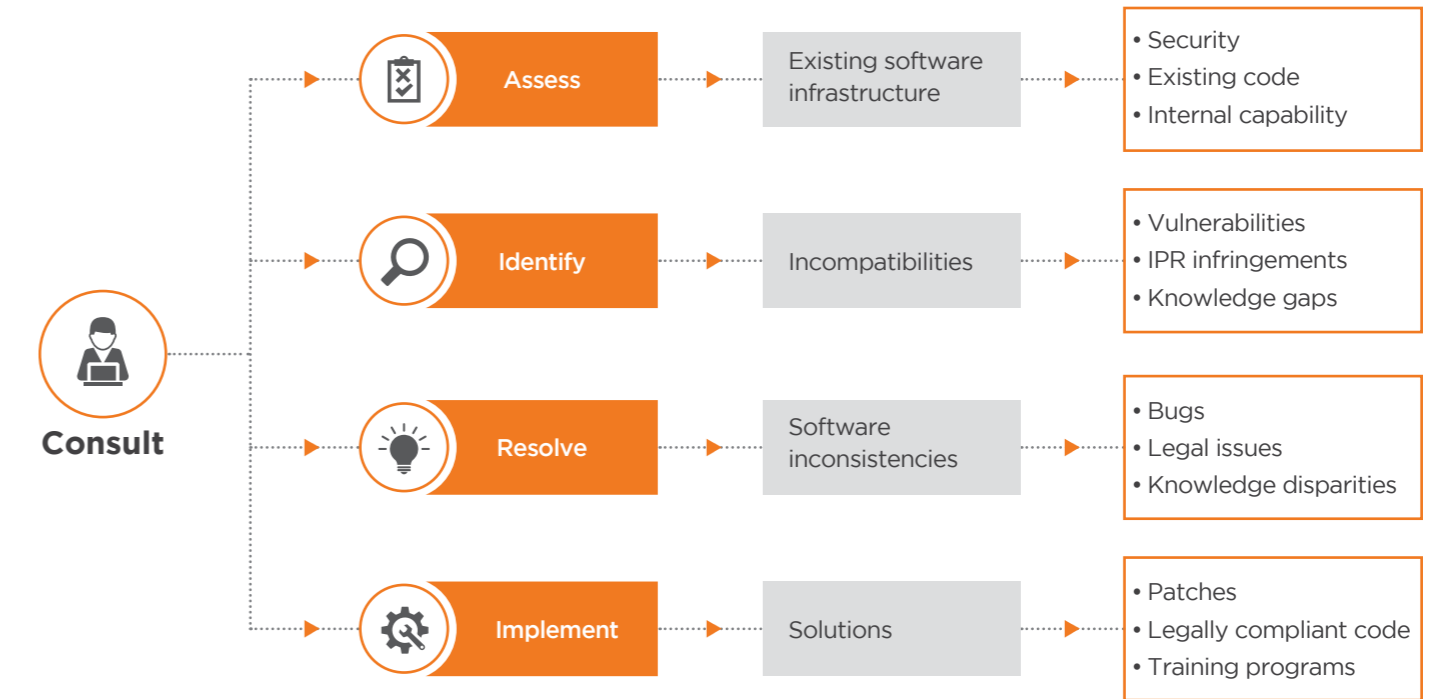

**Other services**

Apart from staying legally compliant, getting the most out of your OSS requires you to effectively manage Operations and Security.

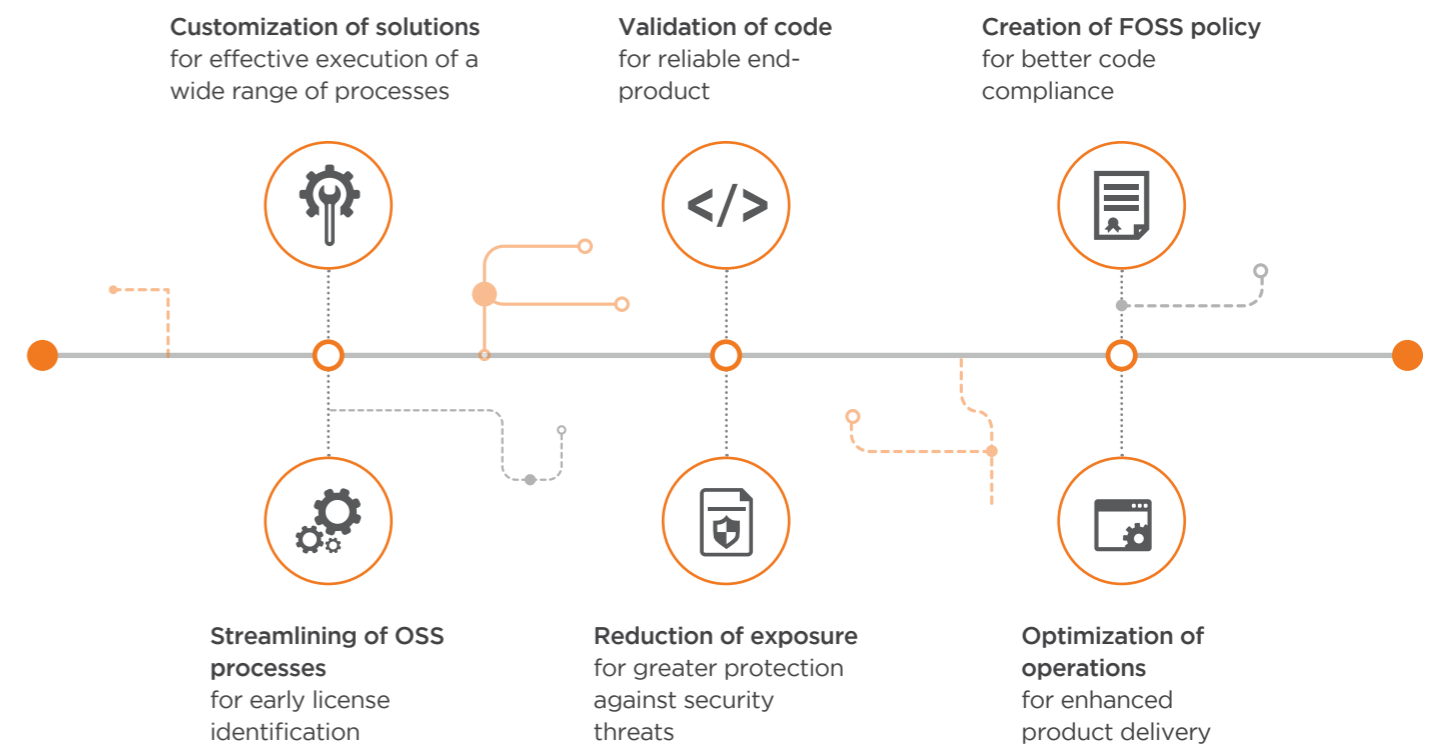

- Legal Remediation
- Legal Opinion

### Superior support for optimal outcomes

Our comprehensive range of OSS services ensure that you have the tools and support needed to grow your business.

At Lyra, it is our constant endeavor to help you leverage OSS to the maximum, enabling you to efficiently meet your goals. The services we extend are designed to overcome specific challenges and further enhance your business processes.

## A partnership that gives you the edge

With businesses striving to gain a larger share of the market, there is a pressing need to stay ahead of the game. At Lyra, we provide solutions that translate into competitive advantage. With more and more businesses moving towards the Open Source System, we ensure that you are at the forefront of the next wave in enterprise software.
